Agenda Item 5

College Intern and Norm Mineta Summer Academy Report

Subject:

Summary of the recruitment, applicant pool, and substance of the summer 2022 college and high school programming at MTC.

Background:

2022 marked the second year of summer youth programming since the pandemic halted the existing college and high school internship programs in 2020. The college internship program has resumed in a hybrid work environment with current college students paired with MTC mentors. The high school program previously placed high schoolers with local transit operators for paid summer internship experiences. The high school program is now a fully remote learning academy where aspiring public servants gain exposure to the dynamic and diverse work of the Bay Area's regional public agencies.

Issues:

None identified.
