Plan Bay Area 2050: 2024 Annual Progress Update

Subject:

Overview of Plan Bay Area 2050 implementation progress over the past year.

Background:

Plan Bay Area 2050, adopted in October 2021, was a significant update to the regional vision connecting transportation, housing, economic development, and environmental resilience. Soon after adoption, MTC-ABAG staff moved forward with implementation initiatives that laid the groundwork for advancing the plan's 35 strategies.

In fall 2022 and fall 2023, staff prepared annual implementation progress updates to the MTC Planning Committee and ABAG Administrative Committee. The updates included a comprehensive matrix of progress updates and planned activities for each of the plan's 80+ adopted implementation actions. This item refreshes the Plan Bay Area 2050 Implementation Plan updates matrix to reflect significant progress since fall 2023 as well as anticipated activities for the coming 12-month period.

Next Steps:

Development of Plan Bay Area 2050+ is well underway, and MTC-ABAG staff have now begun early efforts to develop its corresponding Implementation Plan with near-term actions slated for years 2026 through 2030. Summer 2024 engagement activities, both with the public and with stakeholders, are informing this critical work to connect long-range strategies with near-term actions. Following anticipated action on the Plan Bay Area 2050+ Final Blueprint in January 2025 by the Commission and the ABAG Executive Board, staff will return to these committees this upcoming winter to share an update on the development of the next Implementation Plan.

Issues:

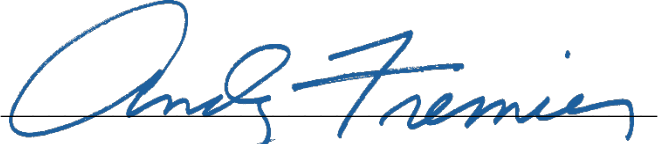

None identified.

Recommendations:
