## Bay Area Partnership Board

October 19, 2021

Agenda Item 4a

### Nominations for Bay Area Partnership Board Vice Chair

---

**Subject:**

Nominations for vice chair for the Bay Area Partnership Board are now open and will remain open until the election, planned for December.

**Background:**

The chair and vice chair typically rotate between transit operators and county transportation agency (CTA) representatives. Given that the current Chair Rick Ramacier's retirement, Vice Chair Kate Miller, representing a CTA, will ascend to the chair position, therefore the incoming vice chair should be a representative of a transit agency.

If you would like to make a nomination, you may make it at the meeting, or you may submit it to staff any time before the election on December 7, 2021. Potential candidates are allowed to nominate themselves.

**Issues:**

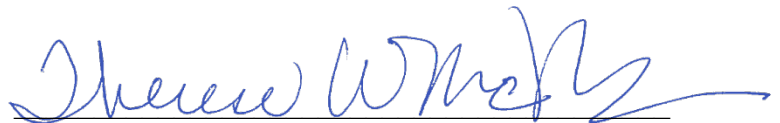

None identified.

## Bay Area Partnership Board

October 19, 2021

Agenda Item 4b

### Discussion of Partnership Board Meeting Restructuring

---

**Subject:**

Discussion of proposed changes to the structure of Partnership Board (Board) meetings.

**Background:**

Last June, the Chair and Vice Chair of the Board, in collaboration with MTC staff sent correspondence to Board members seeking input on the direction of the Board and proposed changes to the structure of Board meetings to reduce redundancy of discussion and presentations that have occurred at other meetings and committees, and instead focus on big transportation topics and problem solving within selected areas. The proposed meeting structure included:

- A “look ahead” meeting including legislative considerations and policy objectives
- Big topic meetings that include subject matter that touches multiple working committees
- Meetings scheduled based on relevance and/or urgency rather than prescheduled dates

**Feedback Received:**

Responses received from Board members is included in Attachment A. Feedback to date has been generally supportive of the proposal. Additional specific input included:

- MTC and Board members should collectively select the big topics to be discussed and a workplan should be developed as a lead up to the “look ahead” meeting.
- There should be regular reports provided to the Commission from the Partnership Board
- A legislative meeting should be held in the December or January timeframe so that it can be timely and instructive.

MTC staff and Board leadership agrees with the above input and is supportive of incorporating it into the proposed meeting structure changes. Additional feedback and discussion on this topic are welcome.

**Issues:**

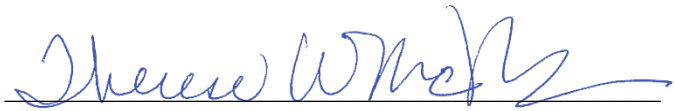

None identified.

**Recommendations:**

Proposed Partnership Board Direction

Dear Partnership Board Member:

This email is to elicit your feedback on proposed changes to the Partnership Board meeting structure/purpose in preparation for further discussion at the next Partnership Board meeting (date to be determined - tentatively in September).

Metropolitan Transportation Commission (MTC) staff and the Chair (Rick Ramacier) and Vice-Chair (Kate Miller) of the Partnership Board met on June 18, 2021 to discuss ways to make the Partnership Board more effective and to identify a structure that better capitalizes on its members' unique perspectives and roles in the region. There was general acknowledgment that the Partnership Board agendas in recent years have been populated with topics that have already been discussed and hashed out, refined, and resolved at the committee level or at other forums such as the Clipper® Executive Board, the Small Operator Forum, and the Bay Area County Transportation Agencies (BACTA). This has resulted in significant topic redundancy and discussion at the Partnership Board level is not necessarily adding value. In our discussion with MTC staff there was general acknowledgment that the work being done at the committee-level has been extremely effective and does not require additional oversight. Moreover, topics of interest frequently vary between transit and county transportation agency members and the Clipper® Executive Board, Small Operator Forum and BACTA offer more relevant channels for discussion.

It is hoped that the proposed Partnership Board meeting changes will result in more substantive discussion among its members and provide greater opportunity to inform transportation-related issues in the region.

Meeting focus: Problem Solving - Big Topics.

Three meetings per year; 1 "look ahead" meeting of major emerging themes and two issue driven workshops

- The "look ahead" meeting would include legislative considerations and policy objectives.
- Big topics would include subject matter that touches multiple working committees.
  - Big topic examples – Corridor Management, Bus Priority, Vision Zero, TOD Policy
- The meetings would be scheduled based upon the urgency/relevance of topics (rather than prescheduled dates).

Thank you for your time.

Sincerely,

Rick Ramacier (Chair)

**RE: Structure of Partnership Board**

Dear Therese and Rick:

Thank you for your effort to reform the Partnership Board and for eliciting our comments. The Bay Area Transportation County Agency executive directors are largely supportive of the proposed structural changes to the Partnership Board. We acknowledge that the Partnership Board meetings have not been effective for some time. However, the subcommittees and working groups are functioning well and are able to address specific and diverse topics. We further concur that repeating presentations at the Partnership Board, once the materials have already been vetted through the committee structure, is often redundant and does not necessarily add any value.

We are generally supportive of the proposal to have three meetings a year that includes one meeting that would focus on the year's upcoming legislative considerations and policy objectives with two other meetings focused on "big topics" that touch multiple working groups and committees. We do, however, have some comments that we believe will further enhance the proposed structure:

- The members of the Partnership Board and MTC staff should collectively select the "big topics" that will be discussed in the three proposed meetings. This could be done by developing a coordinated work plan that evaluates regional needs. This could be completed as part of the lead up to the Look Ahead meeting for approval by the members at that meeting.
- We believe that the Partnership Board is essential and it should have a voice with the Commission. In that vein, any proposed policies and recommendations generated by the Partnership Board should be made known to the Commission by way of formal presentations by Partnership Board members.
- A representative from the Partnership Board should from time to time report out directly to the Commission to underscore the importance and or concern on topics of collective interest.
- Members and the subcommittees and working groups should receive briefings/follow up from policy direction originating at Partnership Board meetings (feedback loop).
- A legislative meeting – whether as part of the "look ahead" meeting or separate - should be scheduled in December/January to ensure that members have an opportunity to provide timely input to MTC staff to influence the current year's legislative program.

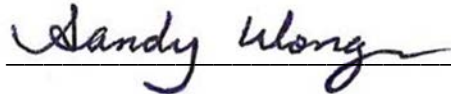

- Consider scheduling the “hot topic” meetings in advance or annually, to hold times on calendars even while the topics are still being developed.

Please contact Kate Miller, NVTB/Partnership Board Vice-Chair, should you have any questions or require further clarification.

## Bay Area Partnership Board

October 19, 2021

Agenda Item 4c

### Selection of Partnership Board Discussion Topics and Work Planning

---

**Subject:**

Staff summary of Partnership Board (Board) member survey responses related to “big topics” to include in the Board work plan, and discussion of considerations for the work planning process.

**Background:**

In keeping with the proposed Board meeting structure changes that would include the development of a work plan focused on two to three big topics, MTC staff recently surveyed Board members for input on which topics should be prioritized and ideas for elements within each topic area that should be focused on. While topline survey results are presented below, full individual responses are included in the Attachment to this item.

**Survey Responses:**

Respondents were asked to rank a set of 10 potential big topics in order of interest. With 22 members responding, seven members selected Equity as their number one topic, seven selected Electrification, and five selected Corridor Management. As seen in the table below, those three topics also received the highest total scores.

| Topic                                                    | Total Score |
|----------------------------------------------------------|-------------|
| Equity -- Achieving equitable outcomes in transportation | 7.1         |
| Electrification -- Assets and Infrastructure Planning    | 6.7         |
| Corridor Management                                      | 6.3         |
| Climate Change                                           | 5.6         |
| Resilience                                               | 5.2         |
| Vehicle Miles Traveled Reduction                         | 5.1         |
| Transportation/Housing Linkage                           | 4.9         |
| Transportation Demand Management                         | 4.7         |
| Safety -- Active Transportation                          | 4.7         |
| Safety -- Vision Zero                                    | 4.7         |

Respondents further provided input on what elements of their highest priority topics would be the most interesting to them to discuss and/or desired outcomes from Board driven action in those areas. While responses were varied, below is a summary of broad themes derived from input provided for the three highest scoring topics. In addition to those listed below, “funding” for each of the topic areas was mentioned several times as an element of interest.

**Equity**

- Evaluation of equitable access to transit and multimodal options geographically and temporally.
- Public engagement to identify equity gaps and strategies to address them.
- Evaluation of how regional decisions impact equity at the local level.

**Electrification**

- Regional coordination and corridor-wide planning for transit and personal vehicle electric charging infrastructure.
- Technology
- Fleet transition planning and best practices
- Partnerships with providers and coordination with utilities

**Corridor Management**

- Regional coordination on corridor improvement project prioritization, funding, and delivery.
- Working with multiple jurisdictions on transit priority lanes and other transit priority treatments; what is the regional role?
- Evaluation and management of travel by mode and time of day.

In addition, several respondents provided general comments on the Partnership Board meeting structure and focused topics including an interest in legislative and funding updates, the need to focus on Plan Bay Area 2050 implementation, and a desire by one respondent to add the Downtown Rail Extension Project (DTX) as a focused topic.

**Work Plan Considerations:**

In the interest of developing a work plan to guide Board action in selected focus areas over the coming months, members should discuss the following questions:

1. Are the three topics of Equity, Electrification, and Corridor Management the right ones to include in the work plan and what sub elements of these topics should be focused on?
2. What outcomes would members like to see from Board action in the selected focus areas?
3. Who will lead work plan action items? Should there be Board subcommittees established to guide progress and develop meeting materials?
4. Could discussion and action item development for any of the focus area topics benefit from a professional facilitator?
5. Are there other considerations that should be discussed related to work plan development?

MTC staff looks forward to working with the Board to make progress on significant topics related to transportation in the Bay Area.

**Issues:**

None identified.

**Recommendations:**

Information Only

Clearly linking the topics to implementation of PBA2050 would be good. Could also include a topic more specific to the funding opportunities over the next 3-5 years.

## Q2

For your top three ranked items above, please list discussion topics that would be of most interest to you and/or desired outcomes from Partnership Board driven action on those items.

Climate ChangeDiscussion topics:

**Measure and evaluate when and where congestion occurs and develop strategies to increase transit market share to reduce congestion. Don't just focus on the commute. Horrific backups/congestion on weekends and associated with special events also contribute to emissions and should be measured, analyzed and also addressed.**

Corridor ManagementDiscussion topics:

**Measure, Evaluate & Manage travel in corridors - both in corridor total and by the various modes (automobile, rail, bus & ferry) as opposed to looking at each mode separately. Measure and evaluate the number of trips by mode and the average speed for each mode in the corridor during different time periods (e.g. commute, weekend, after special events, etc.). Measure and speed up average bus speeds along corridors.**

Equity -- Achieving Equitable Outcomes in Transportation

**Evaluate the availability of transit throughout the entire region (geographically and time of day/night), particularly in communities where all-purpose riders travel to/from; Engage the public to learn where there are gaps (geographically and/or time of day); and evaluate strategies to fill the gaps that are problematic for the community.**

## Q3
