

Update to Authority

Richmond- San Rafael (RSR) Bridge Pilot Project Recommendations

Subject:

For the Interstate 580 (I-580) Richmond-San Rafael (RSR) Bridge Access Improvement Pilot Project (Pilot), staff seeks Authority approval to authorize staff to pursue steps to extend the Pilot on the upper deck pilot with modifications and make the Pilot on the lower deck permanent.

Background:

On May 8, 2024 the BATA Oversight Committee approved referring to the Authority staff's recommendation to authorize staff to pursue steps to extend the Pilot on the upper deck with modifications and make the Pilot on the lower deck permanent (See Attachment A).

An update on the UC Berkeley PATH Pilot Study, the Phase II Final Report has been finalized (See Attachment B) and will be posted on the Caltrans website:

<https://dot.ca.gov/programs/research-innovation-system-information/research-final-reports>.

The data in the May 8 staff report to the BATA Oversight Committee was drawn from a draft of the Phase II Report and is consistent with the Phase II Final Report.

Issues:

None identified.

Recommendations:

Staff recommends that the Authority authorize staff to pursue steps to extend the Pilot on the upper deck with modifications and make the Pilot on the lower deck permanent. This would allow staff to work with Caltrans to pursue a BCDC bridge permit amendment and complete supporting documents and project approvals.
