	Metropolitan Transportation Commission Programming and Allocations Committee
January 11, 2017	Commission Agenda Item 7a MTC Resolution No. 4035, Revised
Subject:	Transit Performance Initiative (TPI) Investment Program – Round Three and Program Update. Recommendations for approximately \$19 million in STP/CMAQ funds and \$1 million in Low Carbon Transit Operations Program funds through the Transit Performance Initiative (TPI) Investment program (\$16 million in funding for TPI Investment Round Three, and re-direction of \$4 million in funding for TPI Investment Round Two) and a semi-annual update on the TPI Investment program.
Background:	 Transit Performance Initiative – Investment Program, Round 3 The TPI Investment program funds low-cost capital investments that can improve operations and customer experience on major transit corridors and systems, and that can be implemented rapidly. In October 2012, the Commission committed \$82 million in federal Cycle 2 STP/CMAQ funds to the Transit Performance Initiative (TPI) Investment Program. In May 2016, the Commission committed one-third of the region's population-based Low Carbon Transit Operations Program (LCTOP) funds to the program. To date, \$65 million has been programmed from TPI Investment funds. Project Selection Process MTC issued a call for projects for Round 3 in September 2016, and received applications from eight agencies, with a total request of approximately \$20 million (summarized in Attachment A). MTC staff convened an evaluation panel consisting of staff from MTC, transit agencies, and a representative of the MTC Policy Advisory Council. Submissions were scored against program fit, project readiness, project management capacity, travel time savings, operating cost savings, benefits to existing and new riders, service frequency, and passenger volumes.
	<u>Funding Recommendations</u> Staff recommends funding five projects for a total of \$16 million, as shown in Attachment A. For federal funds, a local funding match of at least 11% is required. The recommended grant awards fund project elements that improve speed, reduce travel times, increase travel time reliability, enhance customer experience, and can be implemented in a relatively fast timeframe consistent with program objectives. Together, these projects are estimated to save over \$3 million in annual operating costs and reduce travel time along the corridors by 5 to 10 percent (for bus projects) for the over 165 million annual riders on these routes. Fact sheets for the recommended corridors are attached.
	<u>Semi-Annual Program Update</u> The semi-annual TPI Investment program update is attached as Attachment C
Issues:	1. BART's Train Seat Modification Project application included two elements: reconfiguration of train cars to provide more standing room, and a study on innovative vehicle interior design. Staff recommends funding only the capital element, as that is the intent of the TPI Investment program.

- 2. AC Transit's San Pablo and Telegraph Rapid Bus Upgrades project application leverages concurrent funding applications to the Alameda County Transportation Commission. In the event that AC Transit does not receive their full proposed matching funds, staff will work with the agency to prioritize project elements that will deliver the most effective usable segment with TPI funds.
- 3. SamTrans' Traffic Signal Priority on El Camino Real (State Route 82) project will require extensive coordination with local jurisdictions. Caltrans is supportive of the project and has sent a letter of cooperation for the project (Attachment A-1). If awarded, staff urges SamTrans to evaluate ways to shorten the project timeline.
- 4. Transit Performance Initiative Investment Program, Round 2: SFMTA was awarded \$5 million in Round 2 for two projects: \$3.2 million for Muni Forward Capital Transit Enhancements, and \$1.8 million for Colored Lanes on MTA Rapid Network. The Muni Forward projects (\$3.2 million) are now being implemented using San Francisco Transportation General Obligation bond funds rather than TPI funds. \$1 million worth of Colored Lanes work is proceeding with TPI funds, while the remaining components at a cost of \$0.8 million are no longer identified as an SFMTA priority. In total, SFMTA has requested to transfer \$4 million of their Round 2 awards to the Geary Bus Rapid Transit Phase 1 project. Additionally, SFMTA has applied for \$6 million for the same project in Round 3, for a total request of \$10 million in TPI funds for the Geary BRT project. Staff recommends the full requested amount from the Round 3 application, and also recommends the partial transfer of Round 2 funds. However, a 10% penalty is recommended for the Round 2 funds transfer (\$400,000). For administrative purposes, this penalty is reflected in the recommended award amount for Round 3.
- 5. All awards are subject to future action by the awardee's Board, as required by funding sources. Final assignment of the estimated \$1.1 million in LCTOP funds will take place in a future Commission action, along with approval of the other LCTOP projects throughout the region.
- **Recommendation:** Refer MTC Resolution No. 4035, Revised to the Commission for approval.

Ms. Melanie Choy Senior Planner, Programming and Allocations Metropolitan Transportation Commission 375 Beale Street San Francisco, CA 94105

Dear Ms. Choy:

I am writing to express the interest of the California Department of Transportation (Caltrans) in working with SamTrans on developing and implementing Transit Signal Priority (TSP) for its fixed-route transit service along State Route (SR) 82 in San Mateo County.

We understand that SamTrans is applying for Transit Performance Initiative Grant Program funding to install TSP on SR 82 from Daly City to the Santa Clara County border. It would connect to existing TSP on SR 82 in Santa Clara County and would be integrated with signal system software recently installed as part of the San Mateo County Smart Corridor project. TSP is a key operational element that can substantially improve transit travel time and reliability. This project is expected to increase ridership by making transit a more attractive and viable travel option in the corridor. It is consistent with Caltrans' Strategic Management Plan to increase nonauto modes and provide mobility choices.

We look forward to working with SamTrans on the TSP project. As this effort moves into the project development phase, traffic operational analysis will be required. Detailed comments will be provided during the project development process.

Should you have any questions regarding this letter or require additional information, please contact Ina Gerhard, District Office Chief, Transit and Community Planning, at (510) 286-5598 or by email at ina.gerhard@dot.ca.gov.

Sincerely,

JEAN C.R. FINNEY Deputy District Director Transportation Planning and Local Assistance

VTA: Santa Clara Pocket Track Light Rail Interlocking

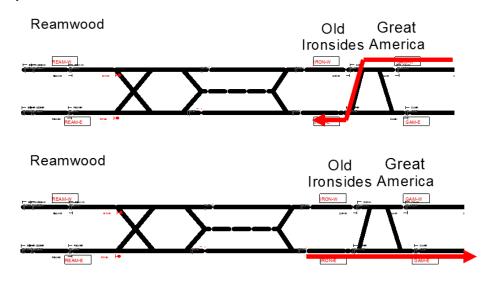

Recommended TPI Funding: \$0.5 M

Estimated Total Project Cost: \$1.5 M Lead Implementing Agency/ Sponsor: VTA

Project Location:	VTA Light Rail tracks in the vicinity of Old Ironsides and Great America stations
Project Description:	As part of the VTA Light Rail Efficiency project, this TPI project will construct an interlocking, an arrangement of track signals and trackwork to prevent conflicting movements of trains through the same location, between the recently constructed Santa Clara pocket track and the main tracks though this section. Specifically, TPI funds will be used to construct the portion of the interlocking that will allow trains to turn back using the Old Ironsides platform.
Project Benefits:	VTA's new light rail operating plan will increase service in the Old Ironsides area, with one line running through every 15 minutes, and another line turning back at the station every 15 minutes. This interlocking will enable trains to turn back more efficiently, saving time and allowing VTA to put one less train in service. The interlocking will also enable VTA to clear any delays in the area more quickly.
Project Schedule:	Environmental Clearance: Exempt Project Completion: Summer 2018

Project Diagram:

Starting at the Great America Platform, a train would proceed west, then crossover to the eastbound track via the crossover east of Old Ironsides station. This train would then layover on the eastbound side of the Old Ironsides Platform. After a westbound train enters the stations, the operator will change ends and prepare to operate the train eastbound. The train could then proceed straight eastbound without going through any additional crossovers.

ABSTRACT

Resolution No. 4035, Revised

This resolution adopts the Project Selection Policies and Programming for federal Surface Transportation Authorization Act following the Safe, Accountable, Flexible and Efficient Transportation Equity Act (SAFETEA), and any extensions of SAFETEA in the interim. The Project Selection Policies contain the project categories that are to be funded with various fund sources including federal surface transportation act funding available to MTC for its programming discretion to be included in the federal Transportation Improvement Program (TIP).

The resolution includes the following attachments:
