2026 Measure: Foundational to Transit 2050+ Implementation

Near-Term Priority

Avoid Service Cuts
with Transit Operations Funding
+
Attract Riders
*with Low-Cost, High-Impact,
Rider-Focused Improvements*

Longer-Term Vision

Enhance and Expand Transit
*with Frequency Improvements,
Service and Capital Expansion*

**Focus of
SB63 Transportation Revenue Measure**

**Focus of
Transit 2050+**

Transit 2050+ Process to Date

Year 2050 Bus Transit Priority Network

Transit 2050+ Final Network Investments through Year 2050

Network Performance Assessment: Overview

Note: Year 2035 and 2050 scenarios are based on the Plan Bay Area 2050+ Final Blueprint, including housing, economy, environment and all non-transit transportation strategies.

Transit 2050+ Goals and Performance Indicators

Create an integrated, well-connected transit network

- Access to jobs
- Overall improvement in access to regional destinations
- *Focus on EPCs & transit-dependent populations*

Recover & grow transit ridership & mode share

- Transit ridership
- Transit mode share (*commute and non-commute*)
- Vehicle miles traveled

Improve reliability & speed of transit service

- Transit travel times
- Comparison of transit to drive times
- Transit speed and priority treatments
- Crowding on transit

Reduce barriers to using transit

- Reliable wait times
- Availability of real-time information
- Safety and security
- Wayfinding & universal design

Goals developed in 2023 by the Transit 2050+ Project Management Team (PMT).

Network Performance Assessment: Big-Picture Findings

The Transit 2050+ Network **increases transit ridership by 41%** and bus riders would have access to twice as many transit service miles with time saving priority treatments by 2050.

Most ridership and mode share gains would be realized by 2035 due to the prioritization of lower-cost, higher-impact improvements in the Transit 2050+ Network (e.g., frequency boosts and transit priority treatments).

Number of jobs that can be accessed by a 45-minute transit trip increases by over 30 percent regionwide, and outcomes are even better for Equity Priority Community households and zero-car households with the Transit 2050+ Network.

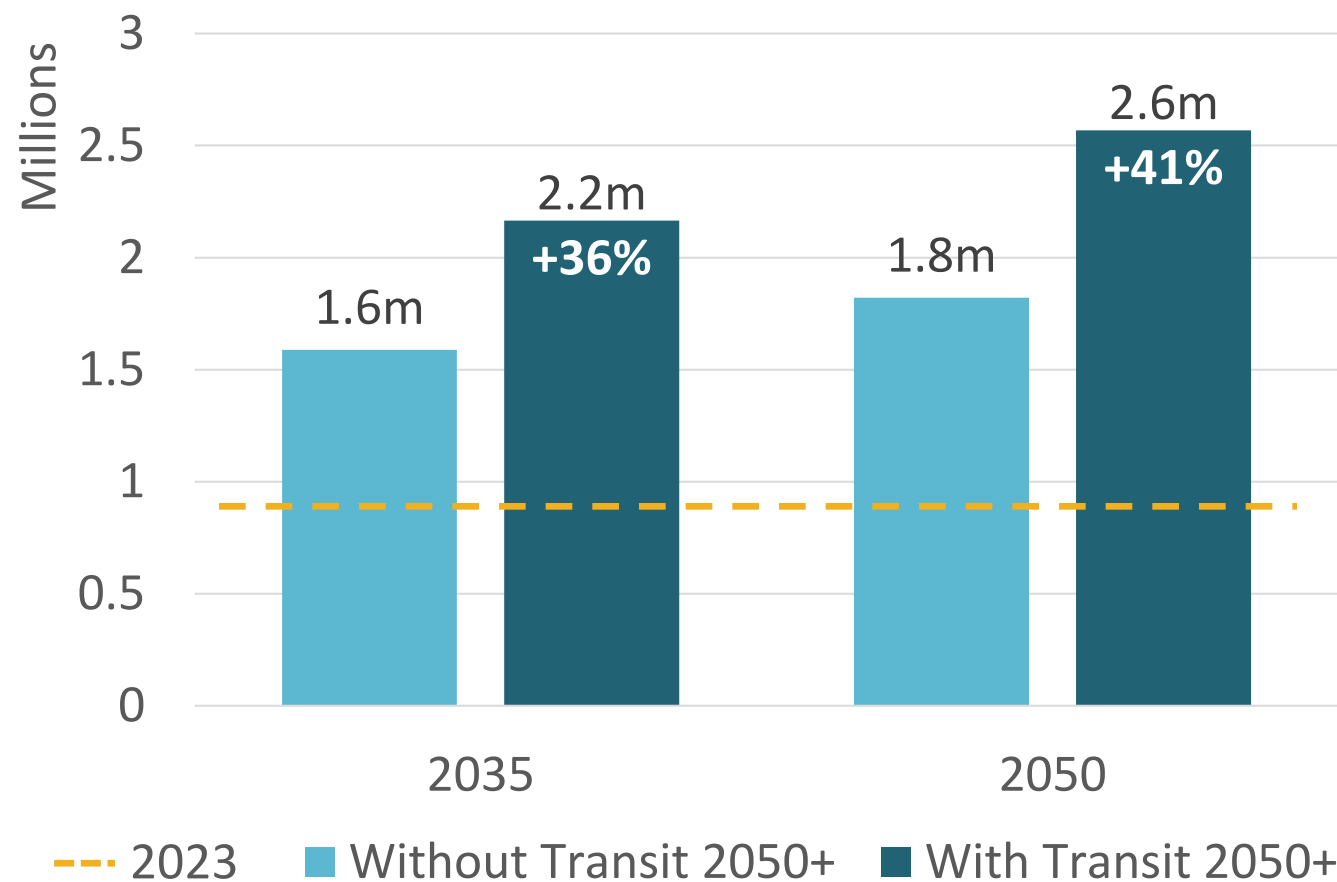

The Transit 2050+ Network **reduces regionwide VMT and GHG** per capita by 3%, contributing toward the state-mandated year 2035 climate target.

Accelerating Ridership Recovery

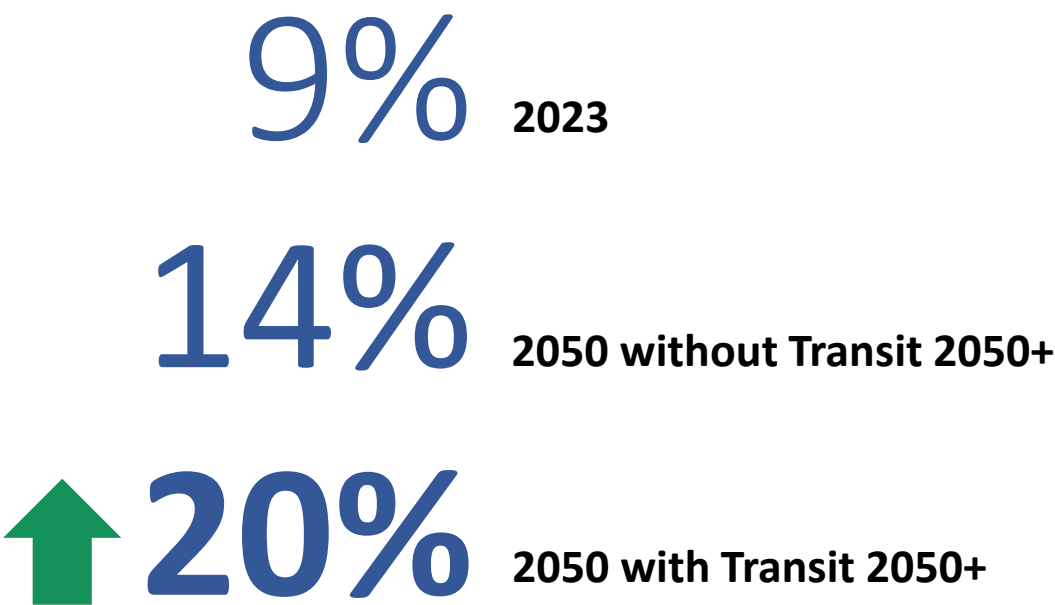

Improved transit frequencies, expansions to new markets, and safety & security investments attract new riders to transit and improve trips for existing riders. Most of the ridership gain occurs by 2035, thanks to near-term prioritization of high-impact frequency improvements.

Total Daily Transit Trips

Transit Commute Mode Share

Expanding Access to Jobs

 Frequency and speed improvements complement denser land uses to increase the number of jobs that can be accessed by transit, especially for Equity Priority Community (EPC) households and zero-car households.

Number of Jobs that can be Accessed by the Average Household Within 45 Minutes via Transit

 **30%** more jobs accessible to EPC households vs. regional average in 2050

 **60%** more jobs accessible to zero-car households vs. regional average in 2050

Improving Transit Travel Times

Transit Travel Time Improvements (AM Peak, 2050)
With vs. Without Transit 2050+ Network

Transit trip times improve due to projects such as BART Core Capacity, San Pablo BRT, and Caltrain frequency boosts. New investments double the share of service miles where buses are given priority.

Share of Surface Transit Service Miles with Priority Treatments

9% 2023

19% 2050 without Transit 2050+

 40% 2050 with Transit 2050+

Reducing Greenhouse Gas Emissions

Increased usage of transit reduces regionwide VMT and GHG emissions per capita by 3% by 2035, contributing toward the state-mandated 19% per capita GHG reduction target for Plan Bay Area 2050+ by 2035.

Per Capita CO₂ Emission (pounds)

Reduction in VMT Per Capita

 **3%** in 2035 with Transit 2050+ vs. without Transit 2050+

 **4%** in 2050 with Transit 2050+ vs. without Transit 2050+

Improving the Customer Experience

 Projects and programs within the Transit 2050+ Final Network help reduce barriers to using transit and improve access and the customer experience.

Barriers

Relevant Transit 2050+ Investments

Safety & security

Transit ambassadors, security personnel, lighting improvements and security cameras systemwide

Wait times

Transfer timing improvements and frequency boosts (e.g., BART Core Capacity & VTA Visionary Network)

Real-time info

New up-to-date mapping & wayfinding and design improvements at transfer hub stations

Wayfinding

Consistent regional mapping & wayfinding continuing to be implemented

Universal design

Universal mapping & wayfinding, design changes at transfer hub stations, and accessible new facilities

Rider-focused improvements that could be funded by the Transportation Revenue Measure – as endorsed by MTC in June 2025 – will serve as a strategic initial commitment.

Looking Ahead: Near-Term Implementation Priorities

Key Themes Identified by the Transit 2050+ PMT

Advocate for **additional transit revenue sources**
(e.g., SB63 / SB125 State Funds)

Advance **rider-focused improvements** in line with
Transit Transformation Action Plan
(e.g., Fare Integration, Mapping & Wayfinding)

Analyze existing services to prioritize service
improvements and transfer coordination
(e.g., MASCOTS, Regional Transit Assessment)

Accelerate improvements to safety, security,
and cleanliness
(e.g., BART Next Generation Fare Gates)

Improve the ways that major transit projects are **delivered**

**Implementation actions, currently
being developed as part of the Plan
Bay Area 2050+ Implementation
Plan, will be included in Transit
2050+ Report:**

- Includes concrete actions for the next five years
- Outlines roles and responsibilities for MTC and partner agencies

Implementation priorities are also reflected in the Regional Network Management Council work plan; these will be further refined as part of an envisioned update to the Transit Transformation Action Plan.

Questions and Comments

Upcoming Milestones:

Draft Transit 2050+ Report (*Fall 2025;
opportunity for public comment/feedback*)

Final Transit 2050+ Report (*Winter 2026*)
