Agenda Item 3a

Update on Caltrans Bay Area Transit Plan

Subject:

Informational update on Caltrans District 4's Bay Area Transit Plan.

Caltrans Bay Area Transit Plan:

MTC coordinates regularly with partner agencies like Caltrans District 4 to align towards a common vision and more effectively plan and deliver transit priority projects in the Bay Area. One such effort MTC and transit agencies are participating in is District 4's Bay Area Transit Plan (Plan), a first-of-its-kind plan which serves to identify infrastructure improvements that improve transit reliability, access to transit, and encourage more transit use along the State Transportation Network (STN) in the Bay Area. The Plan will also identify district-level best practices and strategies to support transit and include:

1. **Toolbox of best practices**, common standards, and types of transit-supportive infrastructure to consider on the STN or at Caltrans facilities.
2. **Strategies and actions** for Caltrans District 4 to adopt to promote and streamline transit-supportive infrastructure, including "transit-access" and "transit-priority" improvements.
3. **Inventory of existing transit-supportive infrastructure** on the STN.
4. District-level **goals, objectives, and performance measures** for transit-supportive infrastructure, with an emphasis on equity.
5. **Prioritization methodology for transit-supportive infrastructure**, with an emphasis on equity
6. Prioritized **list and map of transit-supportive infrastructure needs** along the STN.

The Plan is anticipated to be finalized by mid-2025.

Issues:

None identified.

Recommendations:

Information only.
