		consult with the Partnership Transit		
		Coordination Council in developing a plan that		
		identifies and evaluates opportunities for		
		improving transit connectivity and shall include,		
		but not be limited to, the following components:		
		(1) A network of key transit hubs connecting		
		regional rapid transit services to one another,		
		and to feeder transit services. "Regional rapid		
		transit" means long-haul transit service that		
		crosses county lines, and operates mostly in		
		dedicated rights-of-way, including freeway		
		high-occupancy vehicle lanes, crossing a bridge,		
		or on the bay. The identified transit hubs shall		
		operate either as a timed transfer network or as		
		pulsed hub connections, providing regularly		
		scheduled connections between two or more		
		transit lines.		
		(2) Physical infrastructure and right-of-way		
		improvements necessary to improve system		

Joint MTC ABAG Legislation Committee December 8, 2023 Page 10 of 17

			Funding	
		reliability and connections at transit hubs.		
		Physical infrastructure improvements may		
		include, but are not limited to, improved rail-to-		
		rail transfer facilities, including cross-platform		
		transfers, and intermodal transit improvements		
		that facilitate rail-to-bus, rail-to-ferry, ferry-to-		
		ferry, ferry-to-bus, and bus-to-bus transfers.		
		Capital improvements identified in the plan		
		shall be eligible for funding in the commission's		
		regional transportation plan.		
		(3) Regional standards and procedures to ensure		
		maximum coordination of schedule connections		
		to minimize transfer times between transit lines		
		at key transit hubs, including, but not limited to,		
		the following:		
		(A) Policies and procedures for improved fare		
		collection.

		(B) Enhanced trip-planning services, including		
		Internet-based programs, telephone information		
		systems, and printed schedules.		
		(C) Enhanced schedule coordination through the		
		implementation of real-time transit-vehicle		
		location systems that facilitate communication		
		between systems and result in improved timed		
		transfers between routes.		
		(D) Performance measures and data collection		
		to monitor the performance of the connectivity		
		plan.		
		The connectivity plan shall focus on, but not be		
		limited to, feeder transit lines connecting to		
		regional rapid transit services, and the		
		connection of regional rapid transit services to		
		one another. The connectivity plan shall be		
		adopted following a Metropolitan		
		Transportation Commission public hearing at		
		least 60 days prior to adoption. The commission
